

Lititz Precision Products

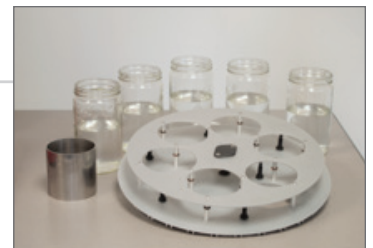

Freedom

The Freedom is a programmable automatic parts cleaner. Parts are automatically transferred from the load station, through four or five ultrasonic cleaning/rinsing stations and a dryer station. The Freedom allows the operator the “freedom” to do other tasks while the machine is automatically cycling. The five station version allows for a pre-cleaning station which cuts the use of cleaning fluids in half, making the Freedom very economical to operate. Designed, fabricated and assembled in the USA.

Retail \$7495

- Available in 5 jar (64mm) and 4 jar (80mm)
- 10 user customizable programs
- Programmable agitate and dry times
- Programmable agitate strength
- Programmable ultrasonic on/off for each station
